TECHNICAL SKILLS

JavaScript (ES6+), React.js, Node.js, Express.js, MongoDB, MySQL, HTML5, CSS3, Docker, Kubernetes, Git

EXPERIENCE

Junior Software Engineer

Junkies Coder

Jun 2024 – Present

Ahmedabad, Gujarat

- Developed scalable RESTful APIs using Node.js and Express.js, resulting in a 25% improvement in server response times and overall performance.
- Integrated third-party services such as payment gateways, social logins, AWS S3 (for file storage), and Twilio (for SMS/OTP), enabling secure transactions, seamless authentication, and reliable communication.
- Diagnosed and resolved production issues, reducing system downtime by 30%.
- Followed Agile development practices—including sprint planning, daily stand-ups, and iterative testing—to ensure code reliability, minimize production bugs, and support continuous delivery.
- Collaborated with cross-functional teams, including mobile developers, to deliver high-quality features on schedule, ensuring alignment with user needs, technical requirements, and product goals.

Web Developer

Trainee, Full-Stack Web Development Program

Jun 2023 – May 2024

Trivandrum, Kerala

- Completed hands-on training in frontend development with React and backend development with Node.js, focusing on fundamental concepts and best practices.
- Worked on multiple training assignments simulating real-world scenarios to strengthen understanding of API communication and application structure.
- Enhanced skills in writing clean, maintainable code through guided refactoring exercises and performance improvements on frontend projects.

PROJECTS

TalentTrove – Online Job Portal

React, Node.js, Express, MongoDB, Socket.IO, OAuth

🐙 GitHub | 🔗 Live

- Developed role-based dashboards for job seekers and companies, supporting job posting, applications, and skill test management.
- Implemented real-time chat with Socket.IO to enable instant communication between candidates and companies.
- Ensured secure authentication and authorization using OAuth 2.0 and JWT, protecting sensitive user data.
- Created an admin panel for comprehensive oversight, including tracking job postings, candidate applications, skill test results, and company registration approvals.

E-Cart – E-commerce Platform

Node.js, Express, MongoDB, EJS, Twilio, OAuth

🐙 GitHub | 🔗 Live

- Developed an e-commerce platform with a product catalog, shopping cart, and order management system to facilitate smooth customer purchases.
- Created an admin dashboard featuring sales analytics, inventory management, and user management.
- Integrated Stripe for secure and reliable payment processing, enhancing the checkout experience.
- Implemented Twilio OTP verification for phone-based authentication, improving account security.
- Utilized Nodemailer to handle password reset workflows.
- Enabled Google OAuth for streamlined and secure user login.

EDUCATION

Bachelor of Computer Applications

Mahatma Gandhi University

2020 – 2023

Kottayam, Kerala
