SUMMARY

Passionate self-taught developer with hands-on experience in crafting dynamic web applications. Proficient in both front-end and back-end technologies, including React, Express.JS, Node.JS, MongoDB. Successfully developed multiple projects, showcasing a blend of creativity and technical expertise.

TECHNICAL SKILLS

Languages: C/C++, HTML, CSS, Javascript, Typescript
Frameworks: React, Next.JS, Express.JS, Node.JS
Databases: MongoDB, MySQL
Developer Tools: VS Code, Git, GitHub, Postman, AWS EC2

PROFESSIONAL EXPERIENCE

Full Stack Developer   Mar. 2024 – Present
Junkies Coder
- Collaborated within a cross-functional team to gather project requirements, establish timelines, and ensure timely feature delivery for an e-commerce application.
- Designed and developed RESTful APIs to facilitate seamless communication between front-end and back-end systems, ensuring efficient data exchange.
- Conducted thorough code reviews, identifying areas for enhancement, and implemented industry best practices to maintain high code quality and scalability.

MAIN PROJECTS

TalentTrove / Github
Online Job Portal - An online job portal for connecting job seekers and recruiters
- Developed an innovative online job portal, fostering connections between job seekers and diverse industries.
- Designed and executed an efficient job search feature with advanced filters, enhancing user experience and efficiency.
- Leveraged JWT mechanisms and optimized query performance to ensure application responsiveness.
- Integrated real-time chat functionality and push notifications, facilitating direct communication and instant updates between job seekers and employers, thus improving user engagement and responsiveness.
- Technologies used: React.JS, Node.JS, Express.JS, MongoDB

E-Cart / Github
E-Commerce Application - An ecommerce application for buying and selling products
- Developed a robust backend for a fully functional e-commerce application using Node.js. Utilized Express.js to streamline the development process and enhance server-side performance.
- Implemented RESTful APIs to handle user authentication, product management, and order processing.
- Employed JWT mechanisms and optimized query performance to enhance the overall responsiveness of the application.
- Technologies used: EJS, Node.JS, Express.JS, MongoDB.

URL-Shortener / Github
- Developed an online URL shortener application to generate short, customized URLs from long URLs, providing users with compact and easy-to-share links.
- Implemented RESTful APIs to handle URL shortening requests, database interactions, and user authentication.
- Technologies used: EJS, Nest.JS, Express.JS, MongoDB.

EDUCATION

Brototype   Trivandrum, Kerala
Full Stack Web Development   2023 - 2024

Mahatma Gandhi University   Kottayam, Kerala
Bachelor's in Computer Application   2020 - 2023
